

## Invitation to The 5<sup>th</sup> Hong Kong International Oncology Symposium

This year the symposium will be held at Hong Kong Science Park on the 10<sup>th</sup> November (Saturday), and at City University of Hong Kong on the 11<sup>th</sup> November (Sunday) respectively.

The aim of the HKIOS is to bring together specialties and share the latest, high-impact biomedical innovations in order to establish a link between science, technology and clinical practice of cancer management. With China's active development of Guangdong-Hong Kong-Macao Greater Bay Area as backdrop, the capacity and horizon of the 5<sup>th</sup> HKIOS will be larger and wider than before, and we are expecting to receive more than 450 registrations this year.

The HKIOS provides an international platform to gather world-class experts, and leading organizations, leveraging on their experience, innovative findings and recent breakthroughs in the field of precision oncology. The HKIOS always strives to attract participants from around the globe, including professions from North America, Europe, Japan, Southeast Asia, China and Hong Kong. The main themes of the 5<sup>th</sup> HKIOS are as follows:

- Innovative sequencing technologies (single-cell isolation and single molecule sequencing)
- Application of artificial intelligence in clinical oncology, gene sequencing and bioanalysis
- Tumor heterogeneity
- Precision radiotherapy and proton therapy
- Precision medicine
- Recent advances in medical management of lung cancer and breast cancer

Details of the event rundown and registration form can be found at the Hong Kong Precision Oncology Society website, <https://www.hkpos.org>

Thank you very much for your support and we look forward to you participation. For any queries, please email [gordonchung@actgenomics.com](mailto:gordonchung@actgenomics.com)

Yours faithfully
